To whom it may concern:

Regarding: Aries Electronics  
Mr. Joe Goetz  
745 N. Gilbert Rd. #124-250  
Gilbert, Arizona 85234

Our first contact with Mr. Goetz dates back to 1997-98 when Joe introduced us to a device designed for use in detection of rekindle following structural fires. Following our first meeting we worked with Mr. Goetz and asked that he expand the applications of his device to include surveillance of smoke & heat for buildings that were being impaired. This effort resulted in a device that we purchased to act in place of fixed systems that were being compromised as result of work.

Our initial use was in our Municipal Complex for a period of 18 days. By being able to provide smoke, heat detection and manual pull stations we were able to ensure for the safety of all our employees and ensure for early detection after hours. The device(s) were silent, reliable and very cost effective and have been utilized by the Town of Gilbert on numerous other occasions. Each use only reinforces the credibility of the product. I believe the Remote Alarm Terminal (R.A.T.) is an exceptional device and has demonstrated significant reliability as an impairment tool.
