Dear Joe,

I just wanted to thank you for making your Fire Rat system available to us during the construction phase of our new facility at 6301 South McClintock in Tempe. The unit has far exceeded our expectations.

We had reason to believe that most of the theft and vandalism that we were experiencing was a result of the same people returning to the scene. We needed a temporary security system that could be set up fast that would detect entry into the building. With no phone lines at the building our options were limited. The Fire Rat proved to be the perfect solution. It was set up on Saturday, May 20.

On May 22nd, we received multiple trips from the motion sensors inside the building. The Tempe police were dispatched immediately. The police department apprehended 3 juvenile suspects still inside the building.

On May 29th, multiple alarms again were received and the police dispatched. After a canine search of the building another suspect was apprehended inside the building.

In both cases, the suspects indicated that they were surprised that a building like this would have a security system, They were wrong!

Thanks Again,
